

Authors

Farid F. Abraham

Data Processing Division, Scientific Center, Palo Alto, California

Dr. Abraham is the Project Leader of the air quality dynamics group at the Scientific Center in Palo Alto, where he joined IBM in 1966, and is a Consulting Associate Professor in the Materials Science Department at Stanford University. His technical interests include nucleation theory, microphysical processes in clouds, air pollution diffusion modeling, and vapor deposition. Over the last three years, he has developed a computer simulation course for graduate students in the applied sciences at Stanford University. He received the B.S. in 1959 and the Ph.D. in 1962, both in Physics from the University of Arizona. From 1962 to 1964 he was a research associate in high energy physics at the University of Chicago and from 1964 until 1966 he was a senior staff scientist with the Lawrence Radiation Laboratory at Livermore (California). Dr. Abraham is a member of the American Physical Society and the American Meteorological Society.

Daniel B. Botkin

Yale University, New Haven, Connecticut

Dr. Botkin is Assistant Professor of Systems Ecology at the Yale School of Forestry. His professional interests concern the dynamics of terrestrial ecosystems. He has conducted research on photosynthesis of forest trees and the effects of air pollutants on photosynthesis at Brookhaven National Laboratory. He is presently engaged in research at the Hubbard Brook Experimental Forest in New Hampshire and at Isle Royale National Park. He received a B.A. in 1959 from the University of Rochester, an M.S. in 1962 from the University of Wisconsin and a Ph.D. in Ecology from Rutgers University in 1968. He joined Yale University in 1968. He is a member of the American Institute of Biological Sciences, the Ecological Society of America and Sigma Xi.

Norman Braslau

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Braslau is manager of the device physics group at the Research Center where he joined IBM in 1961. His present technical interests include hot electron effects in semiconductors, semiconductor device physics and environmental science. He received a B.S. in 1951 from Texas A&M College, an M.S. in 1952 from Ohio State University and a Ph.D. in 1960, all in

physics, from the University of California, Berkeley. From 1952 to 1955 he was on active duty in the U.S. Air Force working on microwave antennas at the Air Force Cambridge Research Center. In 1960 he was a Staff Member at the Lawrence Radiation Laboratory, Berkeley, and from 1960 to 1961 was a visiting fellow at the École Normale Supérieure, Paris. In 1964 he served as Technical Assistant to the IBM Director of Research and in 1968-1969, was Manager of Ph.D. Recruiting for the Research Division. Dr. Braslau is a member of the American Physical Society and Sigma Xi.

Wen-Hsing Chang

Components Division, Burlington, Vermont

Dr. Chang is a staff engineer in the engineering analysis department at the Laboratory in Burlington. He joined IBM in 1968. He received a B.S. from National Taiwan University in 1961 and an M.S. from the University of California, Berkeley in 1963, both in Electrical Engineering. He received his Ph.D. degree in Applied Physics from Harvard University in 1969. Dr. Chang is a member of the IEEE and Sigma Xi.

Bruce A. Clemens

Data Processing Division, Scientific Center, Palo Alto, California

Mr. Clemens, who is currently on educational leave, has worked for IBM at the Palo Alto Scientific Center as a programmer from 1969 to 1971. He received a B.S. in Mathematics in 1967 from Michigan State University, and an M.S. in Computer Science in 1971 from Stanford University.

R. Allan Freeze

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Freeze is a member of the Environmental Sciences group in the General Science Department at the Research Center. His present projects involve the development of simulation models in hydrology and the application of such models to the prediction of watershed response, subsurface pollution and land subsidence. He received his B.Sc. in Geological Engineering in 1961 from Queens University in Kingston Canada and his M.Sc. and Ph.D. in Civil Engineering in 1964 and 1966 from the University of California at Berkeley. Prior to joining IBM in March 1970, he was a research scientist with the Canadian Department of Energy, Mines and Resources in Calgary, Alberta. Dr. Freeze is a member of the American Geophysical Union, and the Geological Society of America.

G. Gambolati

World Trade Corporation, Scientific Center, Venice, Italy

Mr. Gambolati joined IBM Italy in 1969 and is a staff member at the Venice Scientific Center, where he is working on mathematical models in the field of soil mechanics. He received a degree in Mechanical Engineering from the Polytechnic of Turin in 1968, where he was also first assistant in applied mechanics.

Paul Halpern

Data Processing Division, Scientific Center, Palo Alto, California

Mr. Halpern is a member of the air quality dynamics group at the Palo Alto Scientific Center. His technical interests are in dynamic meteorology and air pollution simulation. He received his B.S. in 1961 from the City College of New York and his M.S. in Meteorology from New York University in 1964. Mr. Halpern has been with IBM since 1968. He is a member of the American Meteorological Society and the American Geophysical Union.

Lawrence G. Heller

Components Division, Burlington, Vermont

Dr. Heller is a member of the exploratory memory and technology group in the Laboratory at Burlington. After receiving an A.A.S. in Electrical Technology from the State University of New York at Alfred, he joined the IBM Endicott Laboratory in 1960. While on educational leave, he received the B.S.E.E. in 1964 from Newark College of Engineering and the M.S. and Ph.D. in Electrical Engineering from Iowa State University of Science and Technology in 1967 and 1969, respectively. At Iowa State University, he was a National Science Foundation Fellow and Graduate Research and Teaching Assistant. He returned to IBM at the Burlington Laboratory in 1969. In 1971, he received an IBM Outstanding Invention Award. Dr. Heller is a member of the IEEE, Tau Beta Pi, Eta Kappa Nu and Sigma Xi.

James F. Janak

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Janak joined IBM in 1965 at the Research Center in Yorktown Heights. Prior to this he was an instructor from 1962-1964 and an Assistant Professor from 1964-1965 in Electrical Engineering at MIT. He was a Ford Foundation postdoctoral fellow from 1964-1965. He received his S.B., S.M., and Sc.D. in Electrical Engineering, from MIT in 1960, 1962, and 1964 respectively. Dr. Janak is a member of the theoretical physics group and has worked on a variety of problems in solid state physics. He is a member of the American Physical Society, American Association for the Advancement of Science, Tau Beta Pi, and Eta Kappa Nu.

Stanley K. Jordan

The Analytic Sciences Corporation, Reading, Massachusetts

Dr. Jordan joined the staff of The Analytic Sciences Corporation in October 1969. His research interests include stochastic processes, Kalman filtering, aerospace vehicle guidance, radio and inertial navigation, optimum control of dynamic systems, differential games, fluid mechanics, meteorology, physical geodesy, and finite-difference methods of solving partial differential equations. He received the B.S. degree in Engineering from UCLA in 1966 and the Ph.D. degree in Aeronautics and Astronautics from Stanford University in 1970. During 1967 and 1968, Dr. Jordan was employed by the IBM Scientific Center, Palo Alto, California, and the IBM Research Laboratory, San Jose, California. He is a member of Tau Beta Pi.

Harwood G. Kolsky

Data Processing Division, Scientific Center, Palo Alto, California

Dr. Kolsky has been at the Scientific Center in Palo Alto since 1964 and has held several positions there, including manager of the atmospheric physics group and resident manager of the Center. He was named an IBM Fellow in 1969. Since joining IBM in 1957 he has worked on the STRETCH computer, and on various design projects at a Federal Systems Division engineering office in Omaha, at the Research Laboratory in San Jose and at the Advanced Systems Development Division Laboratory in Los Gatos. Previously, he had been at the Los Alamos Scientific Laboratory. All his degrees are in Physics. He received the B.S. in 1943 and the M.S. in 1947 from the University of Kansas, and the Ph.D. in 1950 from Harvard. Dr. Kolsky is a consultant to the Atomic Energy Commission and is a member of the American Physics Society, the Association for Computing Machinery, the IEEE, and Sigma Xi.

Robert N. Kortzeborn

Data Processing Division, Scientific Center, Palo Alto, California

Dr. Kortzeborn is a staff member at the Palo Alto Scientific Center, where he joined IBM in December, 1965. His technical interests include the study of molecular dynamics, theoretical chemistry, the application of on-line computer systems to experimental apparatus, theoretical air pollution modeling, and efficient use of large computer systems. He received the B.A. in Chemistry from the University of Oregon in 1960. In 1965, he received the Ph.D. in Physical Chemistry from the University of Washington *in absentia* while studying at the University of California in Berkeley. From 1961 to 1965, he was affiliated with the University of California and Atomic Energy Commission, holding at various times positions of postdoctoral research fellow and lecturer in theoretical chemistry. Dr. Kortzeborn is a member of the American Physical Society, Division of Chemical Physics, and Sigma Xi.

William E. Langlois

Research Division, San Jose, California

Dr. Langlois is a member of the large scale scientific computation department at the San Jose Research Laboratory, which he joined in 1959. Prior to this he was a Research Engineer with DuPont. His education includes an Sc.B. in Physics from the University of Notre Dame and a Ph.D. in Applied Mathematics from Brown University which he received in 1953 and 1957 respectively. At the time his paper was submitted, he was on a leave of absence from IBM, having returned to Notre Dame as a visiting professor of mathematics.

Arthur W. Lo

Princeton University, Princeton, New Jersey

Dr. Lo is a professor of Electrical Engineering at Princeton University. He received his Ph.D. from the University of Illinois. He has done research on digital devices and circuits at RCA. He served as a consultant to IBM Components Division Laboratory in Burlington, Vermont during his sabbatical leave from Princeton in 1970. He has contributed a number of technical papers, U. S. patents, and two books in the fields of digital electronics and computer engineering. Dr. Lo is a Fellow of the Institute of Electrical and Electronics Engineers.

George Nagy

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Nagy is a member of the image and signal processing group at the Research Center in Yorktown Heights, where he joined IBM in 1963. In addition to several review papers in the general area of pattern recognition, he has published articles on Chinese character recognition, adaptive devices, analog matrix multipliers, read-only memories, text-image analysis, the use of context in reading machines, and data processing requirements in remote sensing. He received the B.Eng. in Engineering Physics in 1959, the M.Eng. in Electrical Engineering in 1960 from McGill University, and the Ph.D. in Electrical Engineering from Cornell University in 1962. Since then he has spent periods ranging from a few weeks to a year in research and teaching positions at the Stanford Research Institute, the University of Nebraska, Cornell University, and the Université de Montréal. Dr. Nagy is a member of the Institute of Electrical and Electronic Engineers.

Theodore I. Peterson

Data Processing Division, Scientific Center, Cambridge, Massachusetts

Dr. Peterson is a staff member at the Cambridge Scientific Center. He holds advanced degrees in both mathematics and engineering, having received his Ph.D. in Chemical Engineering from the Polytechnic Institute of Brooklyn. He has published books in such fields as computer-aided instruction and statistics, and papers dealing with chemical reaction kinetics, text processing, and gaming. He has been active in both technical and managerial positions, including a post-doctoral period at Harvard University, where as a Research Fellow, he worked in computing areas related to medicine and education. With IBM since 1957, he is currently working in such areas as systems performance and applications of interactive systems. He is a member of the Association for Computing Machinery, and is chairman of the group in the American Institute of Chemical Engineers which is responsible for the programming of mathematical and information processing activities.

Liau-Jang Shieh

Data Processing Division, Scientific Center, Palo Alto, California

Dr. Shieh is a staff member at the Palo Alto Scientific Center, where he joined IBM in 1969. He received the B.S. in Meteorology in 1963 from National Taiwan University, the M.S. in 1967 and the Ph.D. in 1969, both from New York University in Meteorology. Dr. Shieh is a member of the American Meteorological Society.

Ching-Cheng Shir

Research Division, San Jose, California

Dr. Shir is a member of the large-scale scientific computation department at the research laboratory in San Jose, where he joined IBM in 1968. His technical interests include the numerical study of atmospheric pollutant dispersion, atmospheric turbulence, and planetary boundary layer. He received the B.S. in 1962 in Mechanical Engineering from the National Taiwan University; the M.S. in 1965 and the Ph.D. in 1967, both in Aeronautical Engineering from the University of Minnesota. In 1968, he was an assistant professor at the Rensselaer Polytechnical Institute. Dr. Shir is a member of Air Pollution Control Association, Environmental Sciences Institute, Tau Beta Pi, and Sigma Gamma Tau.

Jorge H. Tolaba

Thomas J. Watson Research Center, Yorktown Heights, New York

Mr. Tolaba is a member of the computing systems department at the Research Center, where he joined IBM in 1963. His main interests are in the field of scientific computation with special emphasis in applications derived from scientific and engineering research. He received his diplomas of Surveyor in 1955, and Civil Engineer in 1957 both at the University of Litoral, Argentina. In 1962 he received his M.S. in Civil Engineering from Oklahoma State University. Mr. Tolaba has completed 33 credits of graduate work in Mathematics at the Courant Institute of Mathematical Sciences, N.Y.U. From 1957 until 1959 he was an instructor in engineering at the University of Litoral, and also worked in the design of reinforced concrete buildings. In 1960 he held a Research Assistantship at Oklahoma State University. From 1960 until 1963 he worked in the design of plate metal structures in the Chicago Bridge and Iron Co. Mr. Tolaba is a member of the Phi Kappa Phi.

Pran N. Wahi

Data Processing Division, Scientific Center, Cambridge, Massachusetts

Dr. Wahi is a staff member of the operations research group at the Cambridge Scientific Center, where he joined IBM in October 1969. His research interests include computer applications in various areas of operations research and management science, and use of simulation in education. He received a B.S. in Mechanical Engineering in 1961 from the University of Delhi, India, an M.S. in Industrial Engineering in 1964 from the Illinois Institute of Technology, an M.Phil. and a Ph.D., both in Operations Research from Yale University in 1969. From 1961 to 1962 he worked with the Department of Atomic Energy, India, and from 1964 to 1967 he was a Research Engineer in the operations research group at Boeing. Dr. Wahi is a member of the ORSA, TIMS, AAAS, and Sigma Xi.

James R. Wallis

Thomas J. Watson Research Center, Yorktown Heights, New York

Dr. Wallis has been a member of the environmental research group at the Research Center since 1967. His previous research has been on soil fertility and erosion, stream sedimentation, as well as the use of multivariate statistics and time series analysis applied to hydrology. He received a B.S. in Forestry in 1950 from the University of New Brunswick, an M.S. in Logging Engineering from Oregon State University in 1956, and Ph.D. in Soil Science from the University of California, Berkeley in 1965. In 1966-67 he was a Charles E. Bullard post-doctoral fellow at Harvard University. Dr. Wallis is a member of the Society of American Foresters, the American Geophysical Union, and Sigma Xi.

H. H. Wang

Data Processing Division, Scientific Center, Palo Alto, California

Dr. Wang is a member of the applied physics department at the Scientific Center in Palo Alto, where he is currently investigating numerical methods in meteorology and in air pollution diffusion computation. He joined IBM at the Systems Development Division Laboratory in Poughkeepsie after he received his Ph.D. in Mathematics from the University of Texas in 1964. He was transferred to the Scientific Center in 1967. Dr. Wang is a member of the Society for Industrial and Applied Mathematics.
